

Here is your opportunity to try out the powerful PBXnSIP software package at a very attractive price. We've created a new VoIP Demonstration & Evaluation Kit exclusive to our resellers. The PBXnSIP NFR package offers the full feature set of any modern IP-PBX.

Overview

- **5 x Extensions** - Configure 5 extensions for your small business or testing/evaluation lab.
- **10 x Accounts** - Configure up to 10 Agent Groups, Auto Attendants, Many Extension Ringing Groups, Hunt Groups and more.
- **2 x Domains** - Offers the ability to configure PBXnSIP to service 2 independent companies, ideal for hosted solutions.
- **3 x Trunks** - Configure up to 3 ITSP accounts or SIP trunks.
- **Call Recording** - Record up to 5 simultaneous calls.
- The pbxnsip NFR Kit is supplied with two components – the pbxnsip software and an ALLOY-8169V2 network card. The pbxnsip software license is bound to the MAC address of the NIC.

This software package is NFR (NOT FOR RESALE).

It is available to resellers now as part of Alloy's continued commitment to providing our resellers with the best resources and support.

PBXnSIP is also available in both Windows and Linux flavours. Visit - <http://www.pbxnsip.com.au/pbxnsip.htm> for a full overview of this powerful product.
